Preschool Quality Improvement Plan Summary

Flinders Children's Centre & Tji Tji Wiltja Preschool

Goals	Challenge of Practice	Success Criteria
To deepen children's understanding of number sense.	If we develop and embed agreed practices for intentional planning and assessing of children's mathematical language then numeracy will improve.	Children confidently use appropriate mathematical language and demonstrate number sense in everyday play scenarios. Evidence from documentation demonstrates this as well as site data collection. Demonstrating their knowledge of mathematical language including digit, and base ten.
To improve children's conversational language.	If we implement a consistent, whole-site approach to support children expressing their ideas and their confidence to communicate with others then we will improve children's conversational language.	Children engaging confidently in conversations with others and group experiences. Evidence reflected in oral language screener to be conducted in terms 1 and 3. Observation analysis will determine the effectiveness of the read write inc resource.

National Quality Framework Priorities	Key steps
Supporting children to care for and become environmentally friendly.	Intentionally teaching children how to care for and be environmentally responsible through gardening. Nature play and bush kindy. Incorporating and recycling natural materials into weekly program.
